

2023

### **Suggested narrative**

*In [year], we conducted a double materiality assessment to help inform [company]'s business strategy and operations, guide our disclosure, and help us identify stakeholder priorities to enhance our engagement. The process allowed us to both validate known important issues and identify new or emerging issues that may impact our company, as well as the potential impact our business and operations may have on the environment and society.*

*We conducted this assessment internally, supported by the use of Datamaran, a software analytics platform that provides the foundation to our ESG governance process, including materiality.*

*Through this smart, data-driven process, we are able to: focus only on the key issues that matter; monitor changes and be agile when responding to stakeholders; and advance internal collaboration and leadership knowledge.*
