

FRONT-END ANGULAR JS INTERN JOB VACANCY

All about us:

We are Datamaran: a fast-paced, energetic and high-growth technology company.

We help our clients identify and monitor ESG risks and opportunities - so they can be successful.

We're headquartered in London - with offices in New York City and Valencia - and serve large corporate and investor clients all over the world!

Our mission is to positively impact the world by creating resilient businesses and helping investors identify these businesses.

We use cutting-edge AI technology - and we hold ourselves to the highest standards of quality - always.

We're a blend of different professional backgrounds and personalities: 20 nationalities with expertise in technology, risk management, law, CSR/ESG, and design.

Our collaborative team brings a lot of passion and energy - we like to surprise ourselves and our clients.

This mix makes Datamaran a unique workplace, and a close-knit one.

Key competencies:

- Hands on experience on HTML5 and CSS
- Javascript on client side and jquery
- Knowledge of web based applications - standards, patterns and approaches that enable web access for all users, irrespective of browsing technology

Good to have Competencies:

- Experience on AngularJS and NodeJS
- Knowledge of version control systems
- Good understanding of JSON/REST
- Experience on D3.js
- Thorough understanding of the responsibilities of the platform, database, API, caching layer, proxies, and other web services used in the system
- Experience on any other Javascript Technology stack like ReactJS or Angular
- Working experience with automated testing (e.g. TDD/BDD & related tools)

Other requirements:

- EC Citizen or candidates from other countries with Work / student visa for Spain

What we are looking for:

We're looking for a highly motivated **front-end developer** with strong problem solving skills, a curiosity for technologies, and a passion for user interface, to join our product team in developing our platform as we improve the product and re-architect for its scale. You will be the bridge between design and engineering, responsible for making sure the front-end application is performing at its best and in line with the latest features/capabilities as much as possible. The role provides the opportunity to work on various aspects of the software solution, including UX conception, feature delivery, defect fixing, and optimization.

When? Starting date: As soon as possible
Where? Location: Valencia, Spain/London, UK
Duration: 6 months

Relevant experience:

- Graduate degree in computer science or any other equivalent qualification
- Professional, precise communication skills
- Have portfolio of professional as well as personal projects
- Have already a valid work permit for either UK or Spain

And in return we offer:

Other Benefits:

- A dynamic and international work environment
- 22 days of annual leave + bank holidays
- Subsidised lunch
- Free snacks in the office
- Guaranteed 300+ sunny days per year

Please send your resumé and cover letter to hr@datamaran.com
