

JUNIOR JAVASCRIPT DEVELOPER - INTERN JOB VACANCY

What we are looking for:

We are looking for a **Junior Javascript Developer - Intern** who wants the opportunity to join our company during a period of exciting growth.

As a Junior Javascript Developer - Intern, you will be working closely with Principal Software Architect and Software developers. You will be involved in updating existing APIs/ writing new ones for our application. You will also be helping us in writing Javascript code for the Front-end and fixing issues in the application.

You will be comfortable working in an extraordinarily fast-paced environment and keep a cool head under pressure.

- **When?** Starting date: As soon as possible
- **Where?** Location: London, UK/Valencia, Spain

Key competencies:

- Hands on experience in writing and debugging Javascript code
- Understanding of REST web services and JSON
- Experience working with MongoDB Database
- Experience working version control softwares (Bitbucket, Github etc.)
- Knowledge of web based applications - standards, patterns and approaches that enable web access for all users, irrespective of browsing technology
- An excellent eye for detail
- Well organised and able to manage own time efficiently

Good to have competencies:

- Knowledge of ECMAScript 6 (ES6) specifications
- Hands on experience in AngularJS or Angular
- Experience working with AWS Lambda
- Understanding of the responsibilities of the platform, database, API, caching layer, proxies, and other web services used in the system Experience on any other Javascript Technology stack like ReactJS, VueJS or Angular

And in return we offer:

Other benefits:

- A dynamic and international work environment
- 22 days of annual leave + bank holidays
- Subsidised lunch
- Free snacks in the office

About us:

We are Datamaran: a fast-paced, energetic and high-growth technology company.

Our cloud based platform Datamaran enables a business process for continuous issues monitoring fully owned by the sustainability and risk teams. It harnesses technology to support decision-makers with an improved materiality analysis process – one that seamlessly integrates into Enterprise Risk Management (ERM) and corporate strategy.

We are headquartered in London - with offices in New York City and Valencia - and serve large corporate and investor clients all over the world!

Our mission is to positively impact the world by helping businesses to ensure continuous resilience through evidence-based decision-making.

We use cutting-edge AI technology - and we hold ourselves to the highest standards of quality - always.

Our team comes with a diverse experience in technology, big data, ESG, law, finance and risk management.

Such a unique mix makes Datamaran a unique workplace, and a close-knit one.

Our values:

Performance-driven

We have different backgrounds, we are from all around the world and we have diverse expertise. What unites us is our focus on performing at our best, continuously learning and thriving as we face new challenges.

Collaborative

We are a close-knit team who support one another with the bigger vision in mind. We think two heads are better than one, and we consult with and support our colleagues to find the best solutions for our clients.

Committed

We are an ambitious company with a mission to put sustainability risk on the radar of every business – and we are passionate about using the latest technology and our creativity to achieve that.

Agile

Change is a constant, and we are ready to bend and flex to adapt to the external environment and jump on opportunities. Our vision is clear, but the path to get there may change; we are excited about every twist and turn.
