

JUNIOR DATA ENGINEER JOB VACANCY

What we are looking for:

We are looking for a Junior Data Engineer who wants to join our company during a period of business and technical growth. As such, you'll be working with our Data Engineering and Data Science teams under our CTO, writing, deploying and monitoring backend services and operating on our datastores, as well as creating cloud systems.

- **When? Starting date:** As soon as possible
- **Where? Location:** London, UK/Valencia, Spain

You will:

- Write backend pipelines and data integrations, primarily in Python
- Deploy and monitor cloud services on AWS
- Orchestrate processes with Airflow
- Work with a variety of databases, such as Redshift, MongoDB or MySQL

You have:

- Strong programming skills in your main language, preferably Python
- Knowledge of Linux/Unix along with Bash and git
- Eagerness to write clean and testable code
- Good knowledge of English

Desirable but not compulsory:

- Experience with one statically typed language (we have some bits in Java and Go)
- Know-how of the functional programming and software engineering principles
- Knowledge of networking and the AWS ecosystem (mostly EC and Lambda)
- Familiarity with Docker, Docker-compose, Kubernetes, Consul, Nomad and other cloud tools

Academic background:

- Degree in Computer Science, Computer Engineering, Telecommunications or Aerospace Engineering, Maths or Physics. In the case of lack thereof, relevant commercial experience

Benefits:

And in return we offer a competitive salary, career progression and additional benefits, including:

- A dynamic and international work environment
- Subsidised meals
- Free snacks

About us:

We are Datamaran: a fast-paced, energetic and high-growth technology company.

Our cloud based platform Datamaran enables a business process for continuous issues monitoring fully owned by the sustainability and risk teams. It harnesses technology to support decision-makers with an improved materiality analysis process – one that seamlessly integrates into Enterprise Risk Management (ERM) and corporate strategy.

We are headquartered in London - with offices in New York City and Valencia - and serve large corporate and investor clients all over the world!

Our mission is to positively impact the world by helping businesses to ensure continuous resilience through evidence-based decision-making.

We use cutting-edge AI technology - and we hold ourselves to the highest standards of quality - always.

Our team comes with a diverse experience in technology, big data, ESG, law, finance and risk management.

Such a unique mix makes Datamaran a unique workplace, and a close-knit one.

Our values:

Performance-driven

We have different backgrounds, we are from all around the world and we have diverse expertise. What unites us is our focus on performing at our best, continuously learning and thriving as we face new challenges.

Collaborative

We are a close-knit team who support one another with the bigger vision in mind. We think two heads are better than one, and we consult with and support our colleagues to find the best solutions for our clients.

Committed

We are an ambitious company with a mission to put sustainability risk on the radar of every business – and we are passionate about using the latest technology and our creativity to achieve that.

Agile

Change is a constant, and we are ready to bend and flex to adapt to the external environment and jump on opportunities. Our vision is clear, but the path to get there may change; we are excited about every twist and turn.
