JUNIOR DATA SCIENTIST
J O B   V A C A N C Y

What we are looking for:

A Junior Data Scientist from a technical or analytical background with a desire to learn.

You will apply state-of-the-art data collection, preparation and natural language processing (NLP) algorithms on our raw data collected from several online sources, in order to provide conclusive insight for our clients.

- **When?** Starting date: As soon as possible
- **Where?** Location: London, UK/Valencia, Spain

You will:

- Carry out data analytics and development of textual analysis applications using primarily Python, MongoDB, SQL Server, Elasticsearch
- Work with our Data Engineers to ensure reliable and optimal data collection and storage strategies
- Employ the latest NLP techniques to analyse and model our textual data to
- provide key, actionable insights.

You have:

- Experience in computing/programming.
- A working level of English
- A desire to research, learn and implement the latest techniques in the field of NLP.

Desirable:

- Experience of programming in Python
- Knowledge of and experience of applying data analysis techniques to analyse real-world data.

Academic background:

- Any mathematics/engineering/technical degree

Key Skills::

- Python, data analysis techniques
- SQL, Elasticsearch, Mongo

About us:

We are Datamaran: a fast-paced, energetic and high-growth technology company.

Our cloud based platform Datamaran enables a business process for continuous issues monitoring fully owned by the sustainability and risk teams. It harnesses technology to support decision-makers with an improved materiality analysis process – one that seamlessly integrates into Enterprise Risk Management (ERM) and corporate strategy.

We are headquartered in London - with offices in New York City and Valencia - and serve large corporate and investor clients all over the world!

Our mission is to positively impact the world by helping businesses to ensure continuous resilience through evidence-based decision-making.

We use cutting-edge AI technology - and we hold ourselves to the highest standards of quality - always.

Our team comes with a diverse experience in technology, big data, ESG, law, finance and risk management.

Such a unique mix makes Datamaran a unique workplace, and a close-knit one.

Our values:

Performance-driven
We have different backgrounds, we are from all around the world and we have diverse expertise. What unites us is our focus on performing at our best, continuously learning and thriving as we face new challenges.

Collaborative
We are a close-knit team who support one another with the bigger vision in mind. We think two heads are better than one, and we consult with and support our colleagues to find the best solutions for our clients.

Committed
We are an ambitious company with a mission to put sustainability risk on the radar of every business – and we are passionate about using the latest technology and our creativity to achieve that.

Agile
Change is a constant, and we are ready to bend and flex to adapt to the external environment and jump on opportunities. Our vision is clear, but the path to get there may change; we are excited about every twist and turn.

Benefits:

And in return we offer a competitive salary, career progression and additional benefits, including:

- A dynamic and international work environment
- Subsidised meals
- Free snacks
